Jason Chalom

Software Engineer at DocFox
Johannesburg Area, South Africa

Summary

I have a strong interest in Computer Science, Electronics and Design. I am a hard worker and am able to learn and pick up skills quickly. I persevere when times get tough and I always work to the best of my ability and actively try and keep my standards high.

I have a keen interest in learning new things and playing with new technologies and ideas.

Experience

DocFox
Software Engineer
February 2018 - Present
South Africa

DocFox
Software Engineer
February 2018 - Present
South Africa

Next45
Software Engineer
February 2018 - Present
Johannesburg Area, South Africa

Working on DocFox

University of the Witwatersrand
Technical Lab Assistant
February 2014 - February 2018 (4 years 1 month)
Maths Sciences Labs, West Campus, University of the Witwatersrand

I ran the Software Development Student Interest group through the Mathematical Sciences department. Another task I also worked on was dealing with the administration of the high performance computing cluster systems in the department.

As part of the Software Development Student Interest group I was busy creating some getting up-and-running lecture courses on different topics relating to software development such as Visual Studio, Android app creation and web development. I have also compiled a small lecture series and have worked on building some applications for the university. The final project at the end of my tenure was to setup a series of online video tutorials related to programming and software development.

I also worked on mentoring a group of undergraduate students to develop system solutions for certain NGO children charities and as an assistant for the Deep Learning Indaba where I was a member of the audio visual team.

Encentivize

Intern

December 2015 - January 2016 (2 months)

Unit 15, 2nd Floor, 1 Bompas Road, Dunkeld West

Worked as an intern on the Encentivize project. Did some C#, AngularJS, NodeJS and web 2.0 development. Used Azure, git, and TeamCity for the development infrastructure. Produced some NodeJS npm packages.
